On-site Sodium Hypochlorite Generators

**ClorTec®**

25 to 100 lb/d (11 kg/d to 45 kg/d)

**ClorTec® Makes Electrochlorination Easy**

De Nora ClorTec® 25-100 on-site sodium hypochlorite generators are designed for high efficiency, low lifecycle cost, durability and reliability. Four model sizes generate from 25 - 100 lb/day (11 kg/d - 45 kg/d) with the ability to easily expand capacity 4X in the same enclosure.

Using just water, salt and power to generate sodium hypochlorite on site eliminates the storage and handling of hazardous chemicals while providing chlorine residual.

The ClorTec® designs include a range of features including:

- Remote monitoring and communication options available
- Unique cell design and flow control features for simplified maintenance and operation
- Modular design and scalability reduces footprint and space requirements
- NSF/ANSI 61 Certified and CE Marking
ClorTec®
On-site Sodium Hypochlorite Generators
25 to 100 lb/d (11 kg/d to 45 kg/d)

Specifications

Control: Automatic batch, controlled by hypochlorite storage tank level
Sodium Hypochlorite: 0.8% ± 0.05 **
Water Supply: Potable water @ 25 - 100 psi (1.7 - 6.9 bar)
Temperature Range: 55°F - 80°F (12°C - 27°C)***
Salt Quality: 99.7% pure dry weight food grade salt or equivalent for best efficiency****
Additional cell increments to meet higher capacity: 25 lb/11.3 kg

Notes:
** Recommended range provided - acceptable range is 40°F - 90°F (5°C - 35°C)
*** Note flow is for generator only, additional water flow will be required for softening system and may vary but generally +15% should be adequate.
 notes: For lower salt purity usage, please contact De Nora Water Technologies
****For lower salt purity usage, please contact De Nora Water Technologies

PLC & Operator Interface: Allen Bradley Micrologix 1400 with AB PanelView Plus 600
Control Panel: Painted Steel with rotomolded fascia
Hydrogen Venting: Passive venting via non-mechanical drop-tube design
Optional Self-Cleaning:
Option A: FAC Concentration 0.65% ± 0.1% at standard salt conversion efficiency
Option B: FAC Concentration 0.8% ± 0.1% at 4 lbs salt/lb FAC conversion efficiency
